

# Preventing Source Pollution & Storm Water Runoff:

- Eliminate or minimize the use of toxic, chemical pesticides, herbicides and fertilizers on your lawn.
- Properly dispose of chemicals during ACUA Household Hazardous Waste collections ([www.acua.com/hhw/](http://www.acua.com/hhw/)).
- Make sure your lawn is aerated to avoid runoff from compacted soils.
- Use native vegetation whenever possible - it requires little to no fertilization. Let portions of your yard return to or stay in a natural
